## COLLEGE ACCEPTANCES

**Zazy**  
**BVSc**  
**Veterinary Science**

### University of Bristol, UK

After gaining extensive work experience in veterinary and equine practices, and with consideration of her reference, International Baccalaureate Diploma subjects, extra curricular activities, and community and service activities, Zazy, from the Class of 2018, has been accepted onto the highly selective Bachelor of Veterinary Science degree course at the University of Bristol. Bristol is one of the most popular and successful universities in the UK and was ranked within the top 5% of universities in the world in the *QS World University Rankings 2019*. This BVSc course is accredited by the Royal College of Veterinary Surgeons for the purpose of eligibility for registration as a veterinary surgeon with that body.

Bristol's modern curriculum introduces Veterinary Science students to the integrated structure and function of healthy animals, and the mechanisms of diseases and their clinical management. Themes running throughout the course instill the importance of professional skills, animal health and welfare, and veterinary public health, which underpin all veterinary disciplines.

For the first three years students are based at the main university campus in Clifton, with at least one

day a week spent at the clinical campus in Langford. Years four and five are taught at the Langford campus, with an extended, lecture-free, final clinical year. It is a requirement of the Royal College of Veterinary Surgeons that all UK veterinary students undertake 38 weeks of extra-mural studies on farms and in veterinary establishments. Bristol Veterinary School has a dedicated team that help students to find suitable placements.

### Hartpury College, UK

Zazy has also been accepted to her safety school, Hartpury College. This is to study for the Bachelor of Science with Honours in Equine Science. Students taking this course study a range of equine science subjects and tailor their degree to suit their career goals. They benefit from world-class facilities including an equine therapy centre, industry-standard science laboratories, and horses on-site.

Equine Science students combine theory with practice on this applied science degree, hearing from industry experts in lectures, and strengthening their learning through field trips. In their final years, students tailor their studies with optional subjects covering biomechanics, nutrition, therapy, behaviour, disease and disorders, and breeding and reproduction. An optional sandwich year on this degree gives students the opportunity to gain valuable industry experience. Students have recently undertaken work placements at the Royal (Dick) School of Veterinary Studies and pharmaceutical companies. They can also take part in exchange programmes, studying for a semester in the USA.

## COLLEGE ACCEPTANCES

**Roarke**  
**BA / BS**  
**Biological Sciences -**  
**Ecology & Evolutionary**  
**Biology**

### University of Denver, CO

In recent weeks, Roarke has received two acceptances from universities in the United States of America. He has chosen to attend the University of Denver where, for his Bachelor of Art or Science, he will major in Biological Sciences.

The University of Denver's undergraduate program in Biological Sciences includes options for both a Bachelor of Arts and a Bachelor of Science. While both majors include heavy coursework in the biological sciences, they differ in other aspects of their curricula. Students pursuing the BA complete two quarters of math and one year of chemistry in conjunction with a different minor. By offering students a broad foundation in biology, the BA opens up a range of career options that combine a strong background in biology with other disciplines. Major strengths of the department include the prevalence of small, specialized courses taught by active researchers in the discipline as well as the opportunity to conduct in-depth research with the University's faculty.

Located where the Great Plains meet the Rocky Mountains, the University of Denver embodies the spirit of exploration and discovery that defines its region and its history. The University is a private institution built on exploration through research and collaboration among educators, students, and local and global communities. With nationally recognized academic programs, a history of widespread influence, a forward-looking vision for a 21st century education, and a deep commitment to promoting inclusion,

the University of Denver opens a world of opportunity to students and empower 'Pioneers', like Roarke, to make a difference around the world. [www.du.edu](http://www.du.edu)

### Partial Scholarship

Based on his academic achievement at AISL, and his standardized test scores, Roarke has been awarded a partial scholarship to attend the University of Denver, covering 50% of his tuition. Well done Roarke!

### University of Colorado Boulder, CO

Roarke has also been accepted to attend the University of Colorado Boulder. As one of only 34 U.S. public research institutions in the Association for American Universities, the University of Colorado Boulder is all about realizing the positive impacts of new knowledge. From offering dozens of exciting programs in a range of academic fields, to serving as one of the world's most dynamic research and innovation hubs, to working closely through hundreds of public outreach efforts with communities across Colorado and the world, the University takes pride in helping its students, faculty, staff, and partners turn new ideas into productive outcomes that change lives.

## COLLEGE ACCEPTANCES

**Nir**  
**BA**  
**Media and Culture**

### University of Amsterdam, Netherlands

Nir has now been accepted by 100% of the universities to which she applied. Her last acceptance came from the University of Amsterdam. This was to study for the Bachelor of Arts in Media and Culture, taught in English.

The world we live in is profoundly mediated. Many aspects of our daily lives are now fundamentally structured and informed by media such as, television, film, and news channels, and derive from the arts, politics, economics, to our collective memories. This has changed significantly in recent years because of our constant engagement with media through the use of smartphones, apps, and social media platforms including, YouTube, Instagram, Facebook, Netflix, WeChat, Whatsapp and Snapchat. We are constantly consuming and engaging with feature films, television programmes, documentaries, and many other types of audiovisual “texts”. The need to understand and analyse audiovisual discourse is therefore more urgent than ever, across all media platforms.

This degree course puts the rapidly changing global media landscape centre stage and trains students to position themselves more critically within it, preparing them for careers in the media, at cultural institutions, and in academia. [www.uva.nl](http://www.uva.nl)

**Mohamed**  
**BA (Hons)**  
**Architecture**

### University of Sheffield, UK

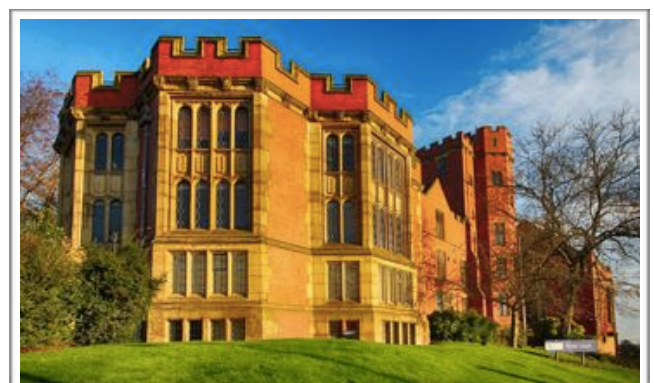

Mohamed also has more choice of which university to attend, having recently received an acceptance from the University of Sheffield to study for the Bachelor of Arts with Honours in Architecture. The University of Sheffield rated 13th in the UK in the 2019 *QS World University Rankings*.

The Architecture degree brings together a balanced university education with a professionally orientated and accredited course. It combines lecture-based modules with a creative studio culture.

The lectures develop a broad knowledge base ranging across the sciences and humanities. This knowledge is then brought to the studio where it is tested and developed through a sequence of design projects. Lecture courses are delivered by staff who are all at the forefront of their own field of research, thereby ensuring that the information imparted is up-to-date and relevant.

Within the studio, full time members of staff are joined by practicing architects who bring with them topical ideas and skills

from the world of architecture. It is this combination of a rigorous academic base and a creative professional direction that exemplifies architecture at Sheffield. [www.sheffield.ac.uk](http://www.sheffield.ac.uk)

## COLLEGE ACCEPTANCES

**Ali**  
**BA (Hons)**  
**Politics, Philosophy, and**  
**Economics**

### **Royal Holloway, University of London, UK**

Ali now has four universities or courses to choose from, having been recently accepted to Royal Holloway, University of London. He has been offered a place to study for the Bachelor of Arts with Honours in Politics, Philosophy, and Economics, known colloquially by the acronym PPE.

Royal Holloway, University of London is ranked in the top 30 universities in the UK (*Times & Sunday Times Good University Guide, 2018*), and the top 200 universities in the world (*Times Higher Education World University Rankings, 2017-18*). Through world-class research that expands minds and changes lives, the dedication of Royal Holloway's teachers, and the feel of the Royal Holloway experience, the University is a community that inspires individuals to succeed academically, socially, and personally.

From the very beginning, Royal Holloway has uniquely supported the careers of brilliant individuals, from the first female doctor in the western world to politicians, surgeons, scientists, and sportspeople. Famous alumni include author George Eliot (1849); medical doctor Elizabeth Blackwell (1857); and film producer and TV presenter Emma Freud O.B.E. (1984).

**Nils**  
**BA (Hons)**  
**Business and Management**  
**with Industrial Experience**

### **University of Exeter, UK**

Nils also has another university from which to choose to attend. His application to read for the Bachelor of Arts with Honours in Business and Management with Industrial Experience at the University of Exeter has been successful. This course at Exeter was ranked 6th in the UK in *The Complete University Guide 2018*.

The University of Exeter combines world class research with excellent student satisfaction at its campuses in Exeter and Cornwall. It is a member of the Russell Group of leading research-intensive universities. Formed in 1955, the University has 22,085 students from more than 130 different countries. Its success is built on a strong partnership with its students, and a clear focus on high performance.

The degree in Business and Management is a rigorous programme of study on the purpose and functioning of organisations and the associated global business environment. Alongside this academic focus, there are also significant practical elements designed to enhance students' understanding of the roles, expectations, and skills required to excel in their chosen fields of work. On this course, students can opt to undertake a year abroad, or a year in industry, to further increase their experience and employability.
